

Mini Ice Racer

- Called the "Orange Crush", this Mini was developed and raced by Hank Beachy.
 - It was very quick and unique looking with much original engineering in it.
 - This Mini was featured in a couple of national magazines 15 or 20 years ago.
 - Grassroots Motorsports (then Auto-X magazine) did a feature article on this ice racer in the April 1987 issue.
- Ice racing with cars, motorcycles or snowmobiles takes place on frozen lakes or rivers or on carefully groomed frozen lots. It is usually found in Canada, the northern US and in northern Europe.
 - This Mini ran NO front brakes at all, just stock rear drums. No need for brakes on the ice!
 - The Mini Ice Racer was donated by Mark Looman of Ada, MI
